**IMPORTANT: Read attached leaflet before use.**

**STORAGE, TRANSPORTATION AND DISPOSAL:** Only authorised personnel can access baits. Baits must be transported and stored in such a way that unauthorised personnel cannot have access to baits. Do not store the bait in a position accessible to children, livestock or domestic pets. Unless approved by relevant State/Territory authority, users must not store this product after a baiting campaign is complete. This pesticide is only to be kept, stored or transported in a container bearing this APVMA-approved label, as supplied by the manufacturer. Store in a secure locked facility. Store in the closed, original container in a dry, cool, well ventilated area out of direct sunlight. Do not allow baits to contaminate foodstuffs, or feed, for human or non-target animal consumption.

Transport only in original containers and ensure packaging is secure before handling. Do not reuse containers for any other purpose.

Triple or pressure rinse containers before disposal. Break, crush or puncture and dispose of empty containers in a local authority landfill and/or as specified by relevant State/Territory requirements. If no landfill is available, bury the containers at least 0.5m deep in a disposable pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots.

**SAFETY DIRECTIONS:** Very dangerous. Poisonous if swallowed. When opening the container and using baits wear elbow-length PVC gloves. If product on skin, immediately wash area with soap and water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each days use wash gloves and contaminated clothing.

**FIRST AID:** Speed in treatment is essential. If poisoning occurs, contact a doctor or Poisons Information Centre (phone Australia: 13 11 26). If skin contact occurs, remove contaminated clothing and wash skin thoroughly. Remove from the contaminated area. Apply artificial respiration if not breathing. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

**MSDS:** Refer to Material Safety Data Sheet for further information.
